

Maya Collins

Junior Software Developer

Profile

Emerging software developer with hands-on experience building web tools, debugging application issues, and collaborating with engineering teams. Strong foundation in Python, JavaScript, SQL, and user-focused problem solving. Eager to contribute to practical software solutions in a fast-paced technology environment.

Employment History

Software Engineering Intern at Beacon Labs

June 2024 - August 2024

- Built internal React components used by operations staff to review customer tickets faster.
- Wrote Python scripts to clean support data and load weekly metrics into a PostgreSQL database.
- Partnered with two senior engineers to troubleshoot API errors and document fixes.
- Participated in sprint planning, code reviews, and QA testing before feature releases.

Web Development Assistant at Northeastern Student Services

September 2023 - May 2024

- Maintained department pages using HTML, CSS, and JavaScript.
- Created small automation tools that reduced manual spreadsheet updates for student workers.
- Tested forms for accessibility, mobile layout, and browser compatibility.

Education

B.S. Computer Science, Northeastern University

Graduation: May 2025 | GPA: 3.78
