

SOPHIA NGUYEN

JUNIOR FRONT-END DEVELOPER

CONTACT

sophia.nguyen@email.com
(200) 555-3300
Seattle, WA

EDUCATION

B.S. Informatics
University of Washington
May 2025
GPA: 3.78

SKILLS

Python
JavaScript
React
SQL
PostgreSQL
HTML/CSS
Git
REST APIs

CAREER OBJECTIVE

Motivated software developer with hands-on experience building web tools, debugging application issues, and collaborating with engineering teams. Strong foundation in Python, JavaScript, SQL, and user-focused problem solving. Eager to contribute to practical software solutions in a fast-paced technology environment.

WORK EXPERIENCE

Software Engineering Intern

Beacon Labs

June 2024 - August 2024

- Built internal React components used by operations staff to review customer tickets faster.
- Wrote Python scripts to clean support data and load weekly metrics into a PostgreSQL database.
- Partnered with two senior engineers to troubleshoot API errors and document fixes.
- Participated in sprint planning, code reviews, and QA testing before feature releases.

Web Development Assistant

Northeastern Student Services

September 2023 - May 2024

- Maintained department pages using HTML, CSS, and JavaScript.
- Created small automation tools that reduced manual spreadsheet updates for student workers.
- Tested forms for accessibility, mobile layout, and browser compatibility.

PROJECTS

Campus Ride Share

Creator

- Designed a web app that matches students traveling to similar destinations around campus.
- Implemented user authentication, ride posting, and SQL-backed search filters.
- Collected feedback from 20 student testers and improved onboarding screens.

Course Planner Dashboard

Developer

- Built a Flask dashboard to compare course workload, prerequisites, and schedule conflicts.
- Used pandas to clean sample enrollment data and generate summary charts.
