EDUCATION

B.S. Computer Science
Colorado State University
May 2026
GPA: 3.64

Relevant Coursework

Data Structures
Algorithms
Database Systems
Software Design

SKILLS

Java, Python, JavaScript, Node.js, MongoDB, SQL

CAREER OBJECTIVE

Computer science student interested in full-stack development, data-driven products, and practical automation. Experienced with class projects, campus technology work, and collaborative coding environments. Comfortable learning new frameworks and translating ambiguous requirements into working prototypes.

PROJECTS

Budget Buddy

Team Developer

- Developed a personal budgeting app with React, Node.js, and MongoDB.
- Implemented category filters and monthly spending summaries for sample users.
- Presented the final project to a class panel and incorporated usability feedback.

Pathfinding Visualizer

Creator

- Built an interactive JavaScript visualization of BFS, DFS, and A* search.
- Added speed controls, wall drawing, and color-coded path reconstruction.

EXPERIENCE

Technology Intern, Lone Star Health Systems

May 2024 - August 2024

- Created SQL queries to identify duplicate patient portal records for review by analysts.
- Assisted with testing a scheduling tool and reported reproducible bugs to the development team.
- Updated internal documentation for onboarding new support specialists.
